

QUESTION PAPER - SET 1

SECTION 1 - PERSONAL DATA

1. Name

2. MOB Number

3. Class 10 Overall Percentage

4. Class 12 PCM percentage

5. What is your Percentage in the Pre sea training till 4 th semester

6. Tell Us about your Strenghts

7. Tell Us about your weakness

8. Have you participated in any extra curricular activities during your Presea training - If yes

9. Please share the details

10. Tell Us about your Family

11. Where do you see your self after 5 years

SECTION 2 - COMPREHENSION PASSAGE

In the late 21st century, the Global Council enacted the "Resource Equilibrium Accord" to address escalating conflicts over dwindling freshwater reserves. The Accord introduced a tiered quota system, assigning water access rights based on each nation's ecological footprint, technological capability for desalination, and per-capita consumption history. While wealthier nations invested in advanced desalination plants and atmospheric water harvesters, poorer nations — despite having smaller ecological footprints — struggled to meet their citizens' basic needs under their reduced quotas.

Critics argued that the Accord unintentionally entrenched inequality, as historical consumption patterns favored nations that had previously overused water.

To address the backlash, an amendment proposed the creation of a "Water Equity Fund" financed by a surcharge on nations exceeding their quota. The fund would support sustainable water projects in under-resourced regions.

Yet, debates continued over enforcement: how to monitor usage accurately, prevent data manipulation, and ensure that the fund genuinely benefited those in need.

1. What was the main goal behind the introduction of the Resource Equilibrium Accord in the late 21st century?

- A. To establish a global water trading market
- B. To balance global water distribution and prevent conflicts over freshwater resources
- C. To reward nations with low per-capita water consumption
- D. To increase funding for desalination research

2. Which aspect most contributed to the Resource Equilibrium Accord unintentionally reinforcing inequality among nations?

- A. Technological advancements in desalination
- B. Inaccurate monitoring of water usage
- C. Historical consumption patterns that benefited countries with prior high water use
- D. Opposition to the Water Equity Fund

3. Which conclusion is best supported by the information provided in the passage about the Resource Equilibrium Accord?

- A. The amendment eliminated all concerns about fairness
- B. Nations with smaller ecological footprints were given larger quotas
- C. Wealthier nations opposed atmospheric water harvesting
- D. The Accord unintentionally reinforced pre-existing inequalities

4. Under the Resource Equilibrium Accord, when would a nation be required to pay a surcharge to support the Water Equity Fund?

- A. When its per-capita consumption is below the global average

- B. When it fails to reduce its ecological footprint
- C. When it does not participate in atmospheric water harvesting
- D. When its water usage exceeds the assigned quota

5. What is the main challenge that remains unresolved regarding the amendment to the Resource Equilibrium Accord?

- A. Lack of sustainable water project ideas
- B. The unwillingness of wealthier nations to pay surcharges
- C. Uncertainty in the fund's revenue source
- D. Ensuring transparency and preventing misuse of funds

SECTION 3 - COMPREHENSION PASSAGE

The Sundarbans, located in the delta region of India and Bangladesh, is the largest mangrove forest in the world. It is home to diverse wildlife, including the famous Royal Bengal Tiger. The mangroves act as a natural barrier, protecting coastal areas from cyclones and storm surges. They also provide livelihoods for local communities through fishing, honey collection, and eco-tourism. However, climate change poses a serious threat to the Sundarbans. Rising sea levels, increasing salinity, and frequent storms are causing habitat loss.

Conservation projects are being implemented, focusing on planting more mangroves, reducing illegal logging, and promoting sustainable fishing practices. International cooperation is considered vital for the long-term preservation of this unique ecosystem.

1. Which of the following is NOT listed as a livelihood activity for local communities in the Sundarbans, according to the passage? (1 Point) Select the option that is not mentioned as a source of livelihood.

- A. Agriculture
- B. Honey collection
- C. Fishing
- D. Eco-tourism

2. Which of the following is a direct impact of climate change on the Sundarbans ecosystem? (1 Point) Select the option that best represents a climate change effect described in the passage.

- A. Increasing salinity of water
- B. Introduction of new wildlife species
- C. Growth in honey collection
- D. Expansion of fishing zones

3. What is one of the key protective roles played by the mangrove forests in the Sundarbans? (1 Point) Select the option that best describes how mangroves benefit the coastal environment.

- A. They increase the frequency of tidal waves.
- B. They are a major source of underground minerals.
- C. They supply drinking water to nearby villages.
- D. They act as a shield against cyclones and storm surges.

4. What is the primary objective of the conservation efforts described in the Sundarbans passage? (1 Point) Select the option that best reflects the main goal of these projects.

- A. To increase honey production for export
- B. To encourage local communities to move to urban areas
- C. To restore and safeguard the mangrove forests and their biodiversity
- D. To expand commercial fishing operations

5. Why does the passage emphasize the necessity of international cooperation for preserving the Sundarbans? (1 Point) Select the option that best explains the importance of cross-border collaboration.

- A. The Sundarbans ecosystem spans across India and Bangladesh, requiring joint efforts.
- B. Local communities are unwilling to support conservation projects.
- C. The region attracts international tourists who fund conservation.
- D. Climate change is only a concern for a few developed countries.

SECTION 4 - ENGLISH APTITUDE

1. Choose the word that is most nearly opposite in meaning to "lucid".

- A. Clear
- B. Vague
- C. Logical
- D. Coherent

2. Identify the correct meaning of the idiom: "To toe the line"

- A. To cross a boundary
- B. To obey rules or authority
- C. To delay action
- D. To take risks

3. Select the word that best completes the sentence: "The technical report was so _____ that even seasoned professionals struggled to understand it."

- A. Obscure
- B. Redundant
- C. Ambiguous
- D. Verbose

4. Choose the correct option to complete the sentence: "You should not leave the meeting _____ you have clarified all your doubts."

- A. Even if
- B. Unless
- C. Provided
- D. Despite

SECTION 5 - NUMERICAL APTITUDE

1. What is the role of a test manager?

- a) To write code for the software
- b) To deploy the software to production
- c) To develop the test environment
- d) To oversee the testing process and ensure test cases are executed

2. What is Functional Testing?

- a) Checking database constraints
- b) Validating that features work as expected according to requirements
- c) Analyzing code logic
- d) Testing the system's performance

3. What is User Acceptance Testing (UAT)?

- a) Debugging system errors
- b) Running automated test execution
- c) Validating business requirements with end-users
- d) Testing system architecture

4. What is Regression Testing?

- a) Testing only new features
- b) Conducting user interface checks
- c) Validating database constraints
- d) Re-testing existing code to ensure new changes don't affect functionality

SECTION 6 - MARITIME KNOWLEDGE

1. Which of the following is NOT a principle of software testing?

- a) Testing shows the presence of defects
- b) Testing is best done only at the end of development
- c) Early testing saves time and cost
- d) Exhaustive testing is impossible

2. What is Integration Testing?

- a) Testing database queries
- b) Testing interactions between multiple modules
- c) Testing a system's overall functionality
- d) Testing UI responsiveness

3. What is System Testing?

- a) Performing end-to-end checks of the entire system
- b) Testing integration interactions
- c) Testing database schema
- d) Testing individual lines of code

4. Which of the following is true about software testing?

- a) Testing only focuses on functional requirements
- b) Software testing guarantees that the software is bug-free
- c) Software testing is an ongoing activity throughout the development lifecycle
- d) Software testing is not needed after deployment
