

# QUESTION PAPER - SET 2

## SECTION 1 - PERSONAL DATA

1. Name

---

---

2. MOB Number

---

---

3. Class 10 Overall Percentage

---

---

4. Class 12 PCM percentage

---

---

5. What is your Percentage in the Pre sea training till 4 th semester

---

---

6. Tell Us about your Strenghts

---

---

7. Tell Us about your weakness

---

---

8. Have you participated in any extra curricular activities during your Presea training - If yes

---

---

9. Please share the details

---

---

10. Tell Us about your Family

---

---

11. Where do you see your self after 5 years

## SECTION 2 - COMPREHENSION PASSAGE

Archaeology as a profession faces two major problems.

First, it is the poorest of the poor. Only paltry sums are available for excavating and even less is available for publishing the results and preserving the sites once excavated. Yet archaeologists deal with priceless objects every day.

Second, there is the problem of illegal excavation, resulting in museum-quality pieces being sold to the highest bidder.

I would like to make an outrageous suggestion that would at one stroke provide funds for archaeology and reduce the amount of illegal digging. I would propose that scientific archaeological expeditions and governmental authorities sell excavated artifacts on the open market. Such sales would provide substantial funds for the excavation and preservation of archaeological sites and the publication of results. At the same time, they would break the illegal excavator's grip on the market, thereby decreasing the inducement to engage in illegal activities.

You might object that professionals excavate to acquire knowledge, not money. Moreover, ancient artifacts are part of our global cultural heritage, which should be available for all to appreciate, not sold to the highest bidder. I agree. Sell nothing that has unique artistic merit or scientific value. But, you might reply, everything that comes out of the ground has scientific value. Here we part company. Theoretically, you may be correct in claiming that every artifact has potential scientific value. Practically, you are wrong.

I refer to the thousands of pottery vessels and ancient lamps that are essentially duplicates of one another. In one small excavation in Cyprus, archaeologists recently uncovered 2,000 virtually indistinguishable small jugs in a single courtyard, even precious royal seal impressions known as melek handles have been found in abundance — more than 4,000 examples so far.

The basement of museums is simply not large enough to store the artifacts that are likely to be discovered in the future. There is not enough money even to catalogue the finds; as a result, they cannot be found again and become as inaccessible as if they had never been discovered. Indeed, with the help of a computer, sold artifacts could be more accessible than are the pieces stored in bulging museum basements. Prior to sale, each could be photographed and the list of the purchasers could be maintained on the computer. A purchaser could even be required to agree to return the piece if it should become needed for scientific purposes. It would be unrealistic to suggest that illegal digging would stop if artifacts were sold in the open market. But the demand for the clandestine product would be substantially reduced. Who would want an unmarked pot when another was available whose provenance was known, and that was dated stratigraphically by the professional archaeologist who excavated it?

**1. The primary purpose of the passage is to propose**

- A. an alternative to museum display of artifacts
- B. a way to curb illegal digging while benefiting the archaeological profession
- C. a way to distinguish artifacts with scientific value from those that have no such value
- D. the governmental regulation of archaeological sites
- E. a new system for cataloging duplicate artifacts

**2. The author implies that all of the following statements about duplicate artifacts are true EXCEPT:**

- A. A market for such artifacts already exists.
- B. Such artifacts seldom have scientific value.
- C. There is likely to be a continuing supply of such artifacts.
- D. Museums are well supplied with examples of such artifacts.
- E. Such artifacts frequently exceed in quality in comparison to those already cataloged in museum collections

**3. Which of the following is mentioned in the passage as a disadvantage of storing artifacts in museum basements?**

- A. Museum officials rarely allow scholars access to such artifacts.
- B. Space that could be better used for display is taken up for storage.
- C. Artifacts discovered in one excavation often become separated from each other.
- D. Such artifacts are often damaged by variations in temperature and humidity.
- E. Such artifacts' often remain uncatalogued and thus cannot be located once they are put in storage

**4. The author's argument concerning the effect of the official sale of duplicate artifacts on illegal excavation is based on which of the following assumptions?**

- A. Prospective purchasers would prefer to buy authenticated artifacts.
- B. The price of illegally excavated artifacts would rise.
- C. Computers could be used to trace sold artifacts.
- D. Illegal excavators would be forced to sell only duplicate artifacts.
- E. Money gained from selling authenticated artifacts could be used to investigate and prosecute illegal excavators

**5. The author anticipates which of the following initial objections to the adoption of his proposal?**

- A. Museum officials will become unwilling to store artifacts.
- B. An oversupply of salable artifacts will result and the demand for them will fall.
- C. Artifacts that would have been displayed in public places will be sold to private collectors.
- D. Illegal excavators will have an even larger supply of artifacts for resale.
- E. Counterfeiting of artifacts will become more commonplace

## SECTION 3 - COMPREHENSION PASSAGE

The Sundarbans, located in the delta region of India and Bangladesh, is the largest mangrove forest in the world. It is home to diverse wildlife, including the famous Royal Bengal Tiger. The mangroves act as a natural barrier, protecting coastal areas from cyclones and storm surges. They also provide livelihoods for local communities through fishing, honey collection, and eco-tourism. However, climate change poses a serious threat to the Sundarbans. Rising sea levels, increasing salinity, and frequent storms are causing habitat loss.

Conservation projects are being implemented, focusing on planting more mangroves, reducing illegal logging, and promoting sustainable fishing practices. International cooperation is considered vital for the long-term preservation of this unique ecosystem.

**1. Which of the following is NOT listed as a livelihood activity for local communities in the Sundarbans, according to the passage? (1 Point) Select the option that is not mentioned as a source of livelihood.**

- A. Agriculture
- B. Honey collection
- C. Fishing
- D. Eco-tourism

**2. Which of the following is a direct impact of climate change on the Sundarbans ecosystem? (1 Point) Select the option that best represents a climate change effect described in the passage.**

- A. Increasing salinity of water
- B. Introduction of new wildlife species
- C. Growth in honey collection
- D. Expansion of fishing zones

**3. What is one of the key protective roles played by the mangrove forests in the Sundarbans? (1 Point) Select the option that best describes how mangroves benefit the coastal environment.**

- A. They increase the frequency of tidal waves.
- B. They are a major source of underground minerals.
- C. They supply drinking water to nearby villages.
- D. They act as a shield against cyclones and storm surges.

**4. What is the primary objective of the conservation efforts described in the Sundarbans passage? (1 Point) Select the option that best reflects the main goal of these projects.**

- A. To increase honey production for export
- B. To encourage local communities to move to urban areas
- C. To restore and safeguard the mangrove forests and their biodiversity
- D. To expand commercial fishing operations

**5. Why does the passage emphasize the necessity of international cooperation for preserving the Sundarbans? (1 Point) Select the option that best explains the importance of cross-border collaboration.**

- A. The Sundarbans ecosystem spans across India and Bangladesh, requiring joint efforts.
- B. Local communities are unwilling to support conservation projects.
- C. The region attracts international tourists who fund conservation.
- D. Climate change is only a concern for a few developed countries.

## SECTION 4 - ENGLISH APTITUDE

**1. Select the sentence that has the same meaning as: "The cadet received a warning for not adhering to procedures."**

- A. The cadet received a warning because he did not adhere to procedures.
- B. The cadet received a warning although he adhered to procedures.
- C. The cadet received a warning so that he would adhere to procedures.
- D. The cadet received a warning even though he adhered to procedures.

**2. Choose the correct passive voice for the sentence: "The crew completed the cargo operation successfully."**

- A. The cargo operation was completed successfully by the crew.
- B. The cargo operation had completed successfully by the crew.
- C. The cargo operation is completed by the crew successfully.
- D. The cargo operation was being completed successfully.

**3. Choose the word that is most nearly opposite in meaning to "lucid".**

- A. Clear
- B. Vague
- C. Logical
- D. Coherent

**4. Choose the correct option to complete the sentence: "You should not leave the meeting \_\_\_\_\_ you have clarified all your doubts."**

- A. Even if
- B. Unless
- C. Provided
- D. Despite

# SECTION 5 - NUMERICAL APTITUDE

## 1. What is Functional Testing?

- a) Checking database constraints
- b) Validating that features work as expected according to requirements
- c) Analyzing code logic
- d) Testing the system's performance

## 2. What is the role of a test manager?

- a) To write code for the software
- b) To deploy the software to production
- c) To develop the test environment
- d) To oversee the testing process and ensure test cases are executed

## 3. What is User Acceptance Testing (UAT)?

- a) Debugging system errors
- b) Running automated test execution
- c) Validating business requirements with end-users
- d) Testing system architecture

## 4. What is Regression Testing?

- a) Testing only new features
- b) Conducting user interface checks
- c) Validating database constraints
- d) Re-testing existing code to ensure new changes don't affect functionality

# **SECTION 6 - MARITIME KNOWLEDGE**

## **1. What is a bug in software testing?**

- a) A testing method
- b) A feature of the software
- c) A malfunction or flaw in the software
- d) A software update

## **2. What is a test case?**

- a) A list of all the bugs in the software
- b) A document that describes how a test should be executed
- c) A report of testing results
- d) The final version of the software

## **3. Which of the following is true about software testing?**

- a) Testing only focuses on functional requirements
- b) Software testing guarantees that the software is bug-free
- c) Software testing is an ongoing activity throughout the development lifecycle
- d) Software testing is not needed after deployment

## **4. What is Software Testing?**

- a) Analyzing documentation
- b) Writing code
- c) Executing a system to identify bugs and errors
- d) Compiling source code
